

The Concrete Division of the Montana Contractors' Association and Jeff Junkert Construction, Inc. invite you to a Pervious Concrete Pavement Demonstration. You have read about it in magazines and have seen the pervious "Hockey Pucks" at trade shows. Now you can see it placed and finished, on location, at one of Billings Premier "Green Builder's Developments". Industry experts will be available to answer your questions and provide information on this sustainable building material.

Pervious Concrete?
It doesn't hold water!

Concrete has long been recognized as a durable, sustainable building material. The latest technology is Pervious Concrete, a durable, aggregate mixture that eliminates standing water and has a natural, high-traction surface making it perfect for driveways, sidewalks, patios and even parking lots.

Concrete - even when it's gray it's green!
